## Product Range

<b>Inner Diameter [mm]</b>	100, 140, 200, 300
<b>Length Glass Body [mm]</b>	500, 850
<b>Temperature Range [°C]</b>	4–40

## Wetted Parts

<b>Version</b>	<b>Wetted Parts</b>
<b>AB version (aqueous buffer)</b>	Borosilicate glass 3.3. PVDF, PTFE, EPDM, PE, FEP, PEEK
<b>SR version (solvent resistant)</b>	Borosilicate glass 3.3. PTFE, stainless steel, Kalrez®, FEP

## YMC Pilot – The Flexible Line

The YMC Pilot column range offers full flexibility for your pilot scale applications. In addition to four standard inner diameters and two standard lengths, customisation can be realised based on the requirements of your application.

The columns are characterised by a number of significant advantages:

- Two versions available for full biocompatibility or organic solvent resistance.
- Heating/cooling jackets available as an option for temperature sensitive applications.
- Longer bed length range for SEC applications.

## YMC Pilot – Your Benefits

### Full Resin Compatibility

- Organic solvent resistant version (SR)
- Biocompatible aqueous buffer version (AB)
- Longer bed length range for SEC

### Perfect Match for Your Application

- Customisation possible
- High cost-efficiency
- Design allows easy maintenance

### Easy Operation

- Optimum flow distribution
- Excellent packing results
- Packing adapters available

### Reliable Sealing

- Squeezed O-ring
- Fast replacement
- Easy piston adjustment

## Full Resin Compatibility

YMC Pilot columns are designed for use in pilot and production scale applications with aqueous buffers (AB version) or organic solvents (SR version), which makes them applicable for all common applications in liquid chromatography including normal phase, reversed phase or BioLC.

## Mode Compatibility

Version	Suitable YMC Pilot Column Version*
IEX	AB Version
SEC	AB Version
HIC	AB Version
Affinity	AB Version
MMC	AB Version
RP	SR Version
NP	SR Version

\*Before selecting the right column version for your application, check the compatibility of the column with the used solvents.

# Chemical Resistance

Solvent	AB Version Wetted parts: Borosilicate glass 3.3, PVDF, PTFE, EPDM, PE, FEP, PEEK	SR Version Wetted parts: Borosilicate glass 3.3, PTFE, FEP, stainless steel, Kalrez®
Acetone	Not resistant	Resistant
Acetonitrile	Limited resistant	Resistant
Ammonium dihydrogen phosphate	Resistant	Limited resistant
Cyclohexane	Not resistant	Resistant
Dichloromethane	Not resistant	Resistant
0.1 M EDTA (3%)	Resistant	Resistant
1 M Acetic acid (6%)	Resistant	Limited resistant

n-hexane	Not resistant	Resistant
Isopropanol	Resistant	Resistant
Methanol	Resistant	Resistant
2 M NaOH (8%)	Resistant	Limited resistant
1 M HCl (4%)	Resistant	Not resistant
8 M Urea (36%)	Resistant	Resistant
1 M NaCl	Resistant	Limited resistant
0.5 M Na <sub>2</sub> SO <sub>4</sub>	Resistant	Limited resistant

Not resistant

Limited resistant

Resistant

If your solvent is not listed or you need a resistant column version which is not listed, please contact us for a chemical resistance check or a custom made version.

**Note:** The resistance of the standard versions is based on the resistance of the each wetted part. If one part is limited or not resistant, the whole column is marked with this characteristic as it is the critical part thereof.

For all columns, where the combination of the wetted parts varies from the above listed ones, the chemical resistance can vary, too. Therefore, please contact us if you need assistance regarding the chemical resistance.

## Perfect Match for Your Application

**Customise your YMC Pilot column until it is the perfect match for your application:**

- Inner diameter: Columns with IDs between 60 and 450 mm ID
- Column body: Select the appropriate length for your application and the correct material – borosilicate glass 3.3 or acrylic glass
- Chemical resistance: There is a large number of different material combinations for full resistance
- Regulatory support: Certification and full documentation – BSE/TSE, FDA – are available for validation purposes
- Column stand: For easy unpacking, rotatable racks are available for larger IDs
- Temperature sensitive applications: Heating/cooling jacket available upon request
- Explosion proof area: Electric conductive ATEX versions can be designed

## Easy Operation and Column Packing

YMC Pilot columns are designed with a flow distribution plate and a frit made of fully porous materials, which are securely fixed in the piston. Due to the optimum flow distribution, excellent chromatographic results can be achieved.

Furthermore, the column bed is compressed homogeneously during column packing. This way, an optimum packing quality is guaranteed.

If longer bed lengths need to be packed and additional column volume is required during the consolidation step, packing adapters are available which can be easily attached to the column.

# Training and Seminars

## Glass Column Packing – Laboratory Scale and Pilot Columns

This training will enable you to pack laboratory and process scale columns – using theory as well as practical experience. Different packing methods and procedures for preparing the packing process will be discussed. In the hands-on part of the training, you will pack a column yourself in our application laboratory. Helpful tips for troubleshooting and method optimisation will complement the seminar.

### Contents and Learning Objectives

- How to achieve your packed column – packing methods you can use
- Basics of preparation
- Hands-on experience – all steps you require for packing your column
- How you determine column efficiency
- Troubleshooting – what you can learn from column performance evaluation results

### Target group

Glass column users with alternative qualifications (laboratory assistants, technicians, engineers, chemists)

You can find actual dates for seminars in our seminar flyer at [www.ymc.eu](http://www.ymc.eu) or you can contact us directly:

Phone: +49 2064 427-0

Fax: +49 2064 427-222

Email: [info@ymc.eu](mailto:info@ymc.eu)

# Please inquire for the corresponding catalogues

YMC Pilot<sup>PLUS</sup> is the new standard for your pilot scale applications. It is completely biocompatible and characterised by safe and easy handling. Packing, operating and unpacking the column is a smooth procedure due to a number of significant advantages.

ECO columns are glass columns for use with almost all types of soft gels and medium pressure liquid chromatography applications.

ECO<sup>PLUS</sup> columns meet the highest criteria for professional laboratory use. Particular attention has been paid to the column volume ranges and the pressure resistance, so that high flow rates, performance and efficiency can be achieved.

YMC BioPro IEX Resins products are polymeric ion exchange resins for the purification of biological molecules. They represent one part of the three part YMC-Prep portfolio: silica, hybrid silica and polymer media.

For help in selecting your laboratory or pilot scale glass column, please fill in this questionnaire and send a scan to [info@ymc.eu](mailto:info@ymc.eu).

## Questionnaire for YMC Glass columns

1. Inner diameter (mm): \_\_\_\_\_

2. Minimum bed length (mm): \_\_\_\_\_

3. Maximum bed length (mm): \_\_\_\_\_

4. Bed volume (mL): \_\_\_\_\_

5. Maximum pressure (bar): \_\_\_\_\_

6. Biocompatibility:                                  yes                                   no

7. Packing material: \_\_\_\_\_

8. Particle size of packing material: \_\_\_\_\_

9. Solvents: \_\_\_\_\_

10. Heating/cooling jacket:                                  yes                                   no

11. Quotation for packing adapter required:                                  yes                                   no

12. Regulatory requirements: \_\_\_\_\_
